

# Ενότητα 6

# Πολλαπλασιάζω με το 10

$1 \times 10 = \dots\dots$

$2 \times 10 = \dots\dots$

$3 \times 10 = \dots\dots$

$4 \times 10 = \dots\dots$

$5 \times 10 = \dots\dots$

$6 \times 10 = \dots\dots$

$7 \times 10 = \dots\dots$

$8 \times 10 = \dots\dots$

$9 \times 10 = \dots\dots$

$10 \times 10 = \dots\dots$

Παιχνιδάκι ο πολλαπλασιασμός  
με το **10**!

Συμπληρώνω το μοτίβο.

10 20 .... 50 60 .... 100

.... 90 80 .... 40 ..... 10

Οι πολλαπλασιασμοί με το 10 είναι σκέτο παιχνιδάκι.

Να θυμάστε:

Είναι όπως τον πολλαπλασιασμό με το 1 αλλά βάζω και 0 στο τέλος, π.χ.

$$1 \times 3 = 3$$

$$10 \times 3 = 30$$

Το γινόμενο των πολλαπλασιασμών του 10 τελειώνουν πάντα σε 0, π.χ.

$$10 \times 3 = 30 \quad 7 \times 10 = 70 \quad 10 \times 5 = 50$$

$10 \times 10 = \dots\dots$

$1 \times 10 = \dots\dots$

$10 \times 5 = \dots\dots$

$2 \times 10 = \dots\dots$

$4 \times 10 = \dots\dots$

$3 \times 10 = \dots\dots$

$8 \times 10 = \dots\dots$

$6 \times 10 = \dots\dots$

$9 \times 10 = \dots\dots$

$10 \times 8 = \dots\dots$

$10 \times 1 = \dots\dots$

$10 \times 6 = \dots\dots$

$10 \times 9 = \dots\dots$

$10 \times 3 = \dots\dots$

$10 \times 2 = \dots\dots$

$10 \times 0 = \dots\dots$

$10 \times 4 = \dots\dots$

$5 \times 10 = \dots\dots$

$0 \times 10 = \dots\dots$

$10 \times 7 = \dots\dots$

Συμπληρώνω τα κενά.

$10 \times \dots = 20$      $\dots \times 10 = 10$      $10 \times \dots = 30$      $\dots \times 10 = 50$

$\dots \times 10 = 70$      $\dots \times 10 = 100$      $\dots \times 10 = 90$      $10 \times \dots = 40$

$10 \times \dots = 60$      $\dots \times 10 = 80$      $10 \times \dots = 0$

---

Πόσα δεκάρια έχει το .....

30 →

40 →

10 →

50 →

70 →

90 →

20 →

80 →

100 →

60 →

---

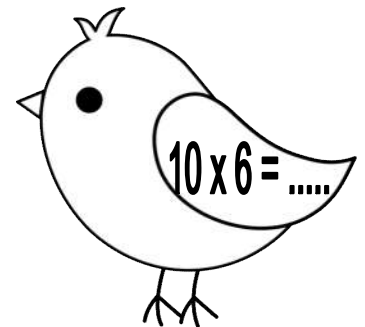

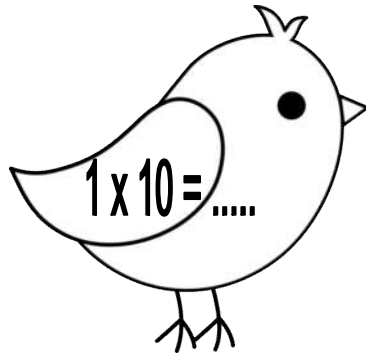

Λύνω το πρόβλημα.

Η μητέρα μου αγόρασε 7 συσκευασίες με πλαστικά ποτήρια. Η κάθε συσκευασία είχε μέσα 10 ποτήρια. Πόσα είναι όλα τα ποτήρια που αγόρασε;

**Μαθ. Πρόταση:** \_\_\_\_\_

**Απάντηση:** \_\_\_\_\_

Βρίσκω την απάντηση και χρωματίζω το μεγαλύτερο.
